## THE HIGH COST OF CHASING CAD/PLM/IoT/ERP Enterprise Product Information

Enterprise Users are wasting time chasing information. Artificial Intelligence can help!

Spent searching for information per User per week

Time spent GATHERING information per week per

**GATHERING** Information

Source: IDC

User

WAITING to receive Information Source: Panopto

Waiting for vital information or recreating or duplicating existing institutional knowledge

Delays due to unshared knowledge have a major impact on project schedules. 66% of all such delays will last up to one week, and 12% will last a month or more.

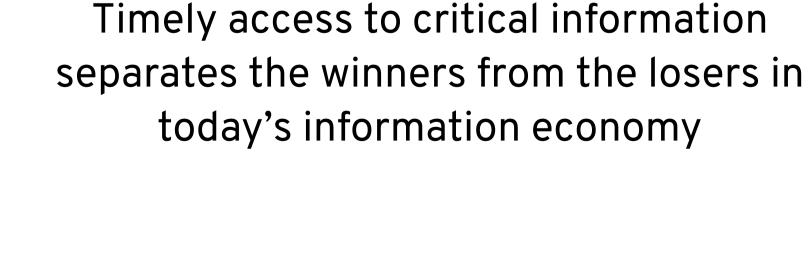

INEFFICIENT **Knowledge Sharing** Costs Source: Panopto

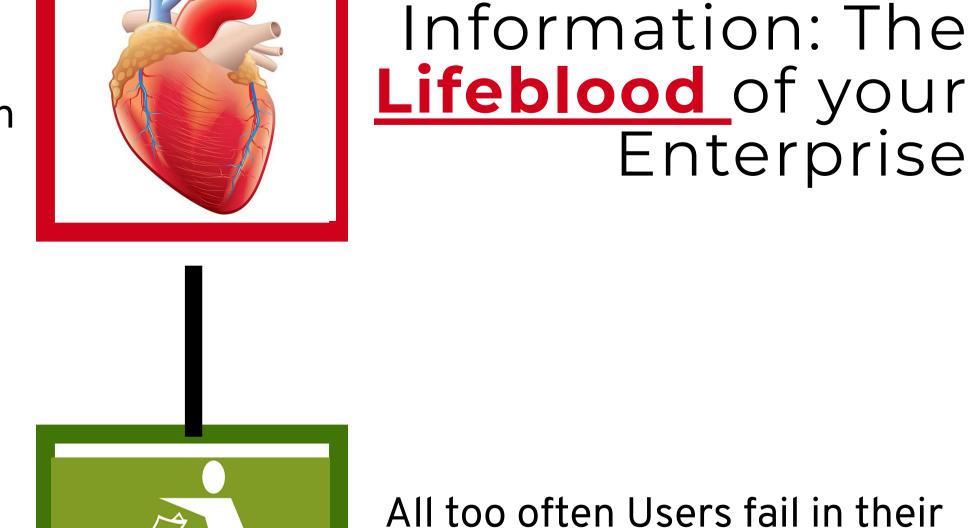

# Improved User Productivity through Punditas Al based Training & Knowledge Dissemination

are caused by outdated information. Missing or incomplete information plagues many projects.

There are all kinds of information disasters. Some are caused by wrong information. Some

Enterprise Users are inundated with too much information, and they have very few tools to help them handle the flood. Everyone seems to be working longer hours and getting less and less done. In short, we spend a lot of time spinning our wheels looking for things and not finding them. (Source: IDC)

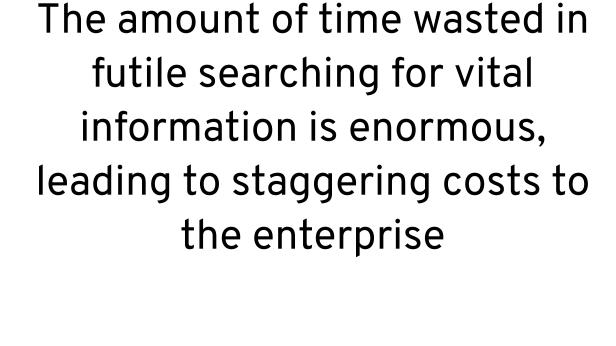

USELESS

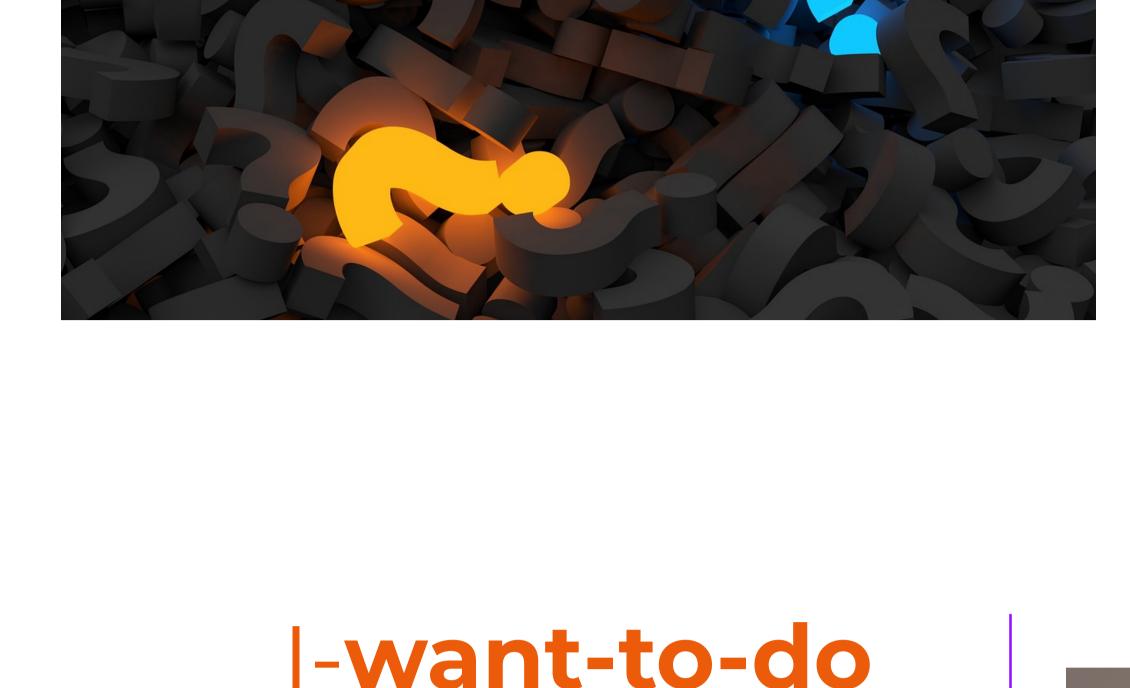

quest to obtain the information they need

Information Is **Useless** if it can't be found and retrieved

# a Day-In-Life of a CAD/PLM/IoT/ERP Enterprise User

### e.g. I want to know how to resolve the issue of CAD software crashing when creating a hole or I want to know

l-want-to-know

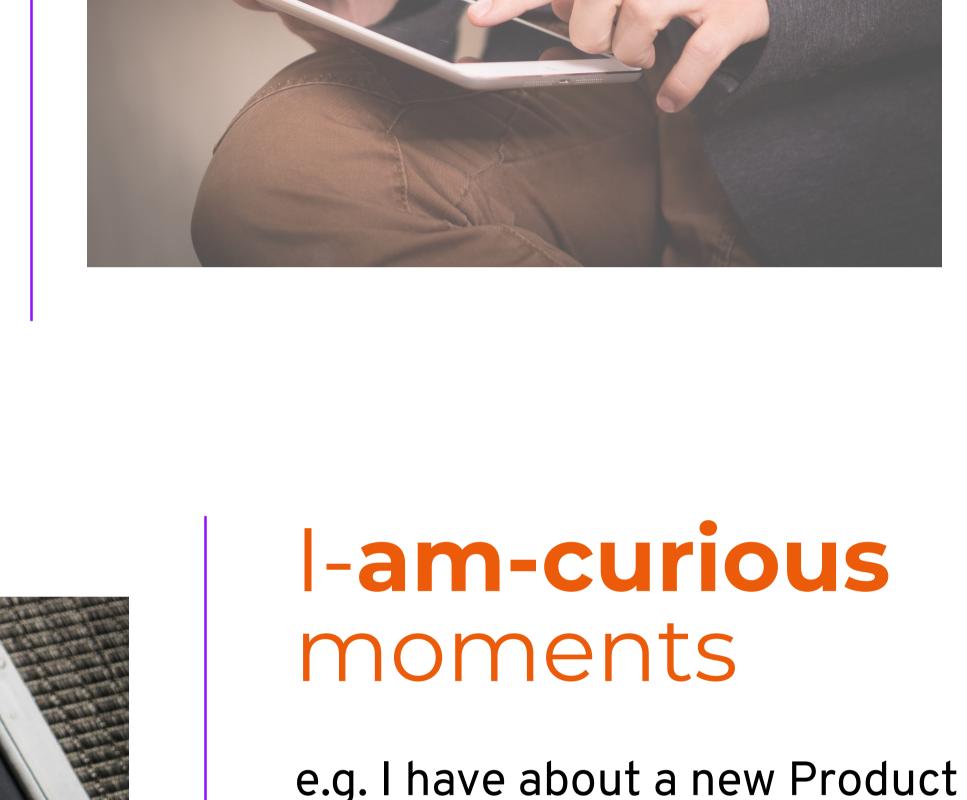

### the best practices for working with Family Tables

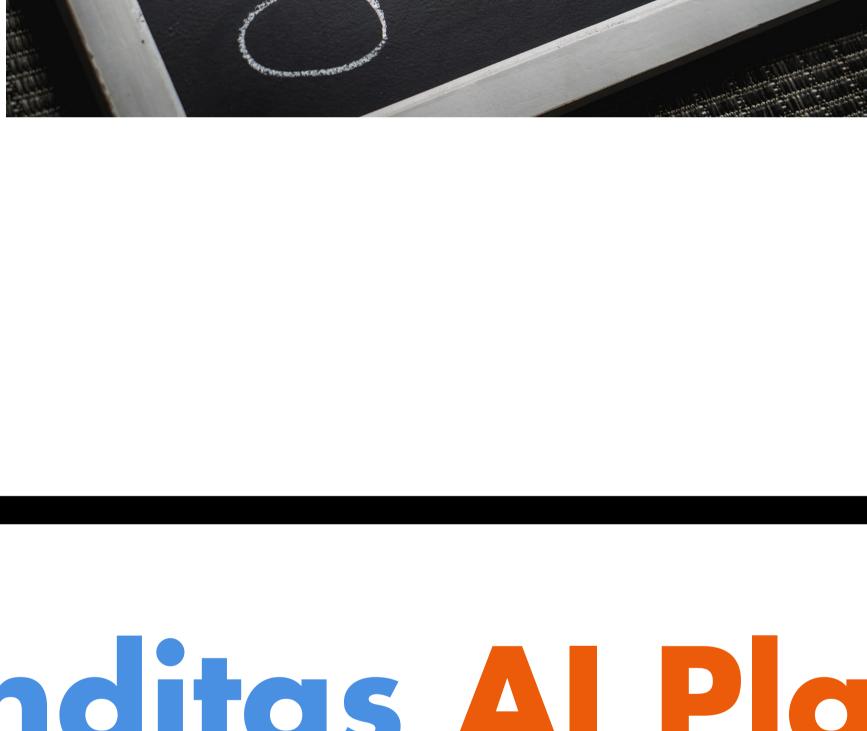

moments

## Table or how do I place a hole precisely with Hole wizard in the CAD software?

e.g. I want to create a Family

moments

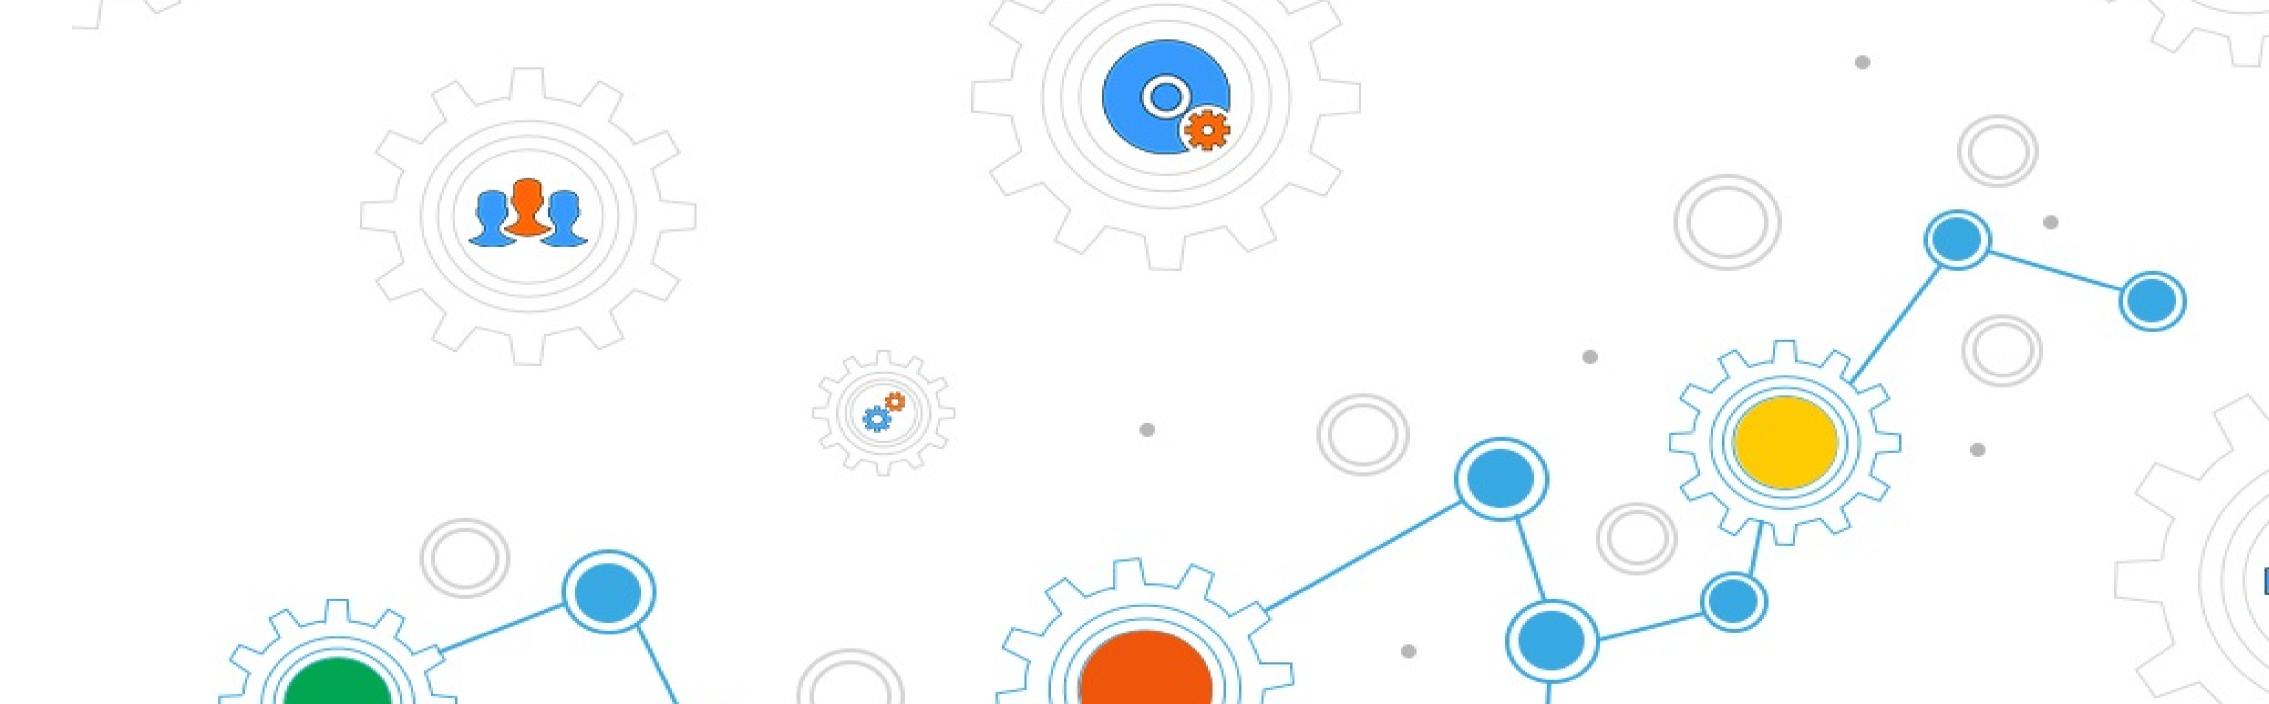

all?

called Creo Simulation Live. Will

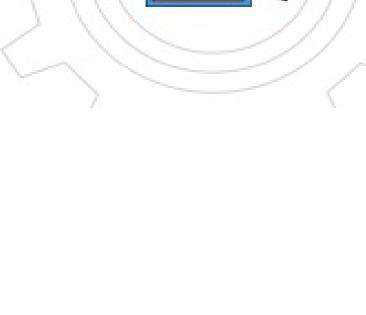

that product/module help us at

Punditas Al Platform is vour Single source of information for the "Product Moments"

Stop the Digital Chase! Punditas Al Platform is your Single Source of Knowledge for Enterprise Software (Creo, Windchill, Solid Works etc). This Knowledge As a Service

offering delivers twelve dimensions of content based on each User's style & preference. Punditas Platform guides Enterprise Users to value quickly & efficiently and dramatically improves User Productivity
