

There's an online discussion happening with or without you!

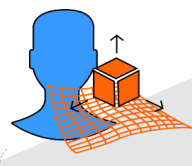

If you choose not to engage, you're simply giving up the ability to take advantage of what's being said

Online Product communities are growing steadily. They are connecting like minded Product Users, Customers, Business Partners to share thoughts, feedback about the Product

The Reality

- **YOU are one among millions of Users** for a CAD, PLM, IoT, ERP or other Enterprise Apps - e.g. Creo Parametric
- Most problems with Enterprise Apps are not unique to YOU
- Most app related issues may have a solution tried & tested by other users across the globe
- There are over quarter millions discussions available for each Enterprise App and this growing by the day
- YOU are missing critical information by not tapping into these discussions
- You are wasting time by not staying on top of happenings of the online community

1 000 000

One in a million

The Challenge

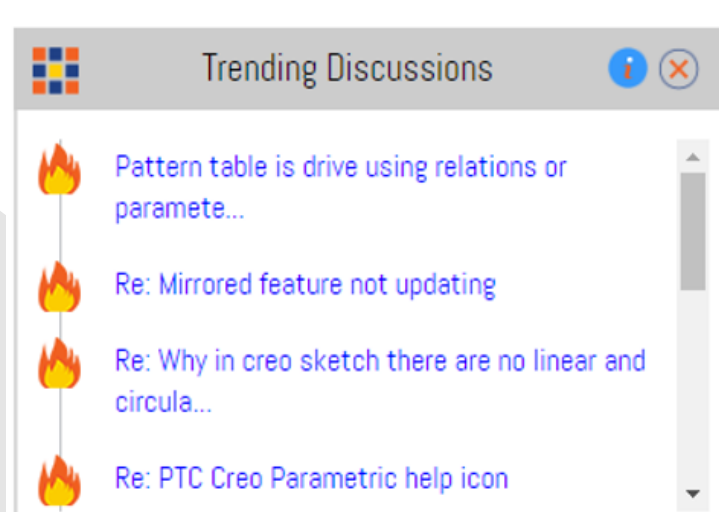

You can read a few 1000 customer comments but not millions

And... New comments are added every minute!!!

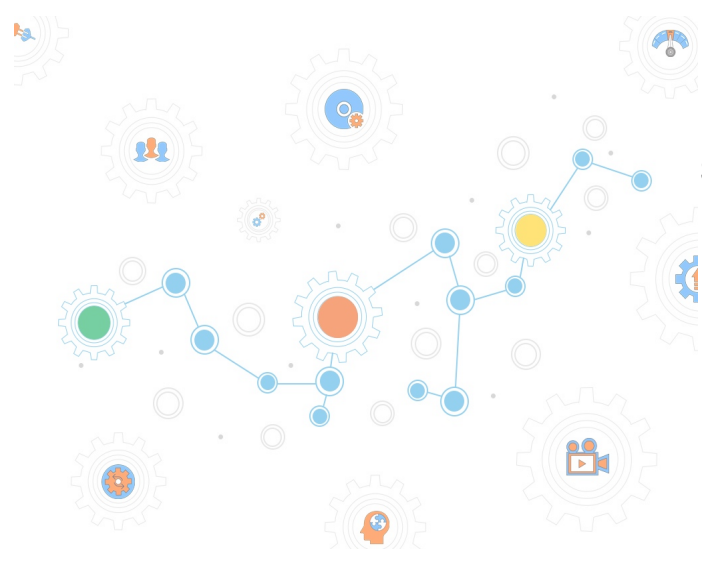

Punditas AI Platform taps into 100's of Product communities

- Punditas AI engine taps into discussions from 100's of Product communities to help you stay current on opinions, feedback and suggestions from the world wide user-base
- Users can be aware of a bug in the Enterprise App or learn Techniques to be efficient with CAD, PLM, IoT, ERP or other Enterprise Apps

Example: In the above picture, seeing that "Mirrored feature is not updating" alerts the user not to spin their wheels if they are seeing the same issue...

About Punditas AI Platform
