

Enterprise Users in the age of Changing Expectations

Enterprise Users are wasting a lot of time finding Tips, Tricks, Tutorials, Best Practices for CAD/PLM/IoT/ERP/Enterprise Applications

Its because we are living in the

1. Age of Information Overload
2. Age of On-Demand
3. Age of Self-Reliance & Personalization
4. Age of Changing Expectations

Brain Drain and Institutional Knowledge retention

Knowledgeable people are retiring, resulting in shortage of talent, expertise and knowledge transfer. AI, Machine Learning, Natural Language Processing technologies can help with capture and management of knowledge

A new generation of employees, a new set of expectations

Younger, technically savvy people are entering the workforce with new expectations. Today's workforce expect personalized experiences, work more in teams, use more technology and seek instant answers. Artificial Intelligence platforms offer a new level of personalization and help in engaging these employees on their terms

Punditas AI Platform can help!
